

RHINESTONE TEMPLATE CREATOR

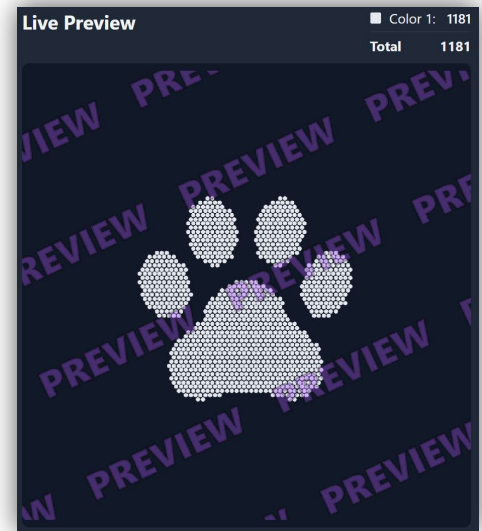

Quick Guide

Note: This Quick Guide is meant to get you up and running quickly. For additional details, please see the User Guide accessible by clicking  at the bottom of the app.

- 1. Tell us about you:** If prompted, please enter your name and email address and follow the instructions to complete sign-on.
- 2. Upload Image:** Drag and drop, Paste (Ctrl+V) or click **Upload** to select a file from your computer.
- 3. Number of Colors:** Select from 1 - 4 colors.
- 4. Stone Size (SS):** Either type the stone size or select an SS button.
- 5. Metric/Imperial Sizing:** Choose  as the default measurement. Then set the width and height in the text box or use the sliders.
- 6. Spacing & Details:** Spacing refers to the distance between stones. Refining Details increases or decreases the amount of light detected in the design. For darker images, choose Less and for lighter images, choose More.

7. **Create Template:** Click **Create My Template** to generate the template in the Preview Pane. Click the button again when making adjustments so the Preview Pane is updated.
8. **Live Preview:** The Preview Pane displays the rhinestone cut file, stone counts and the colors applied.
9. **Pattern:** Grid is the default pattern. If desired, choose others in the **Pattern** pick list. Changed patterns apply instantly in the Live Preview.

10. **Download:** Click **Bundle & Download Files** when finished designing and ready to download the template.
11. **Paywall:** If you have a subscription, this step is skipped. After clicking **Bundle & Download Files**, payment options appear and include a single template purchase, an unlimited monthly or an unlimited annual subscription.

There is no charge for generating templates or making alterations at this time. The paywall only appears when you would like to download the template bundle.

12. **Starting Over:** The **Reset Form** button resets the design and preview panes to their default settings.
